'68 Buick. Now we're talking your language.

We changed the Skylark front and rear, gave it a whole new look, simply because we felt the old look just didn't cut it. Now we've got the new Skylark. We thought you'd like to have a look at a new and better Buick. We put it on the two-door Skylark down in 134 inches.

The new 230-cu., 180-hp engine runs on regular gasoline. It's standard on all Skylark Custom models. We also included in your choices, Skylark Custom comes in four options, 15 colors and 22 trim combinations. So talk to the men who talk your language, your Buick dealer. All Buicks have a full line of General Motors Safety features as standard equipment. For example, side impact doors, energy-absorbing steering column, Wouldn't you really rather have a Buick?
