PANOLA COUNTY OIL, GAS
AND BUSINESS REVIEW

They Belong Together

When our foundations were laying khác and of the information you begin to see these below through the experiences of the people around you, the first thing you will notice is that they don't bear the same relationship. The people of our community have been together for a long time and they are very much aware of the fact that not only are they part of the same community, but they are also part of the same church. With the present emphasis on groupings and social activities, it has become more apparent to the people in our community how closely they are related in the same way that the people you see on the street are related to each other.

Evolution of Pharmacy

By Ken Turner, R. Ph.

The most apparent is the two doctors, both of whom have been in the same medical practice for over 30 years. Dr. Thomas Hawk and Dr. Richard Hawk opened their own practice in 1971 and have continued to work together ever since. As they have become more experienced, they have also become more knowledgeable about the profession and the patients in their care. Their practice has expanded to include a full range of services, from routine checkups to the latest in advanced medical care. They believe in providing the highest quality of care and are committed to the well-being of their patients.
