STATE UPGRADS EMERGENCY CARE

GOOD CITIZENS ALWAYS VOTE

Ilthings we always consider when we examine your eyes.

What does an eye examination at TSO stand for? The idea is to identify problems early so that you can take action to correct them before they become serious. At TSO, we offer a comprehensive eye examination that includes:

1. Visual acuity: A series of single-specimen tests to determine the sharpness of your vision. This is done using a variety of charts and sizes to ensure accuracy.

2. General health: To rule out any medical conditions that might affect your vision or eye health. This includes checking for any signs of diseases like diabetes, glaucoma, or cataracts.

3. Eyeglass prescription: A thorough test to determine the exact strength and shape of your lenses. This helps ensure that your eyeglasses meet your needs.

4. Contact lens fitting: If you wear contact lenses, a comprehensive exam is necessary to ensure proper fit and comfort.

5. Refractive surgery: For patients considering procedures like LASIK or PRK, a detailed eye exam is crucial to determine if you are a suitable candidate.

At TSO, we take the time to explain each step of the examination process. Our team of experienced optometrists will guide you through the process and answer any questions you may have. We believe in providing comprehensive care that is tailored to your specific needs. Come in today for your eye examination at TSO and take the first step towards healthier, clearer vision.
