**SUNDAY REVIEW**

**Tax Or Ration:**

Knowing that almost every imaginable system of taxation would have to be adopted by the Federal government before there could be any hope of reducing the national debt, and that each of these systems would have its own disadvantages, I propose the following plan: In 1960, each citizen of the United States shall pay an annual tax equal to the amount of his income. The tax shall be collected in a single payment, and the amount collected shall be divided equally among all citizens of the United States. This system, I believe, would be the fairest and most equitable of any that could be devised.

RECLINA-ROCKER"
Champagne: A Misunderstood Beverage

One of the most popular alcoholic beverages, champagne is often associated with celebration and luxury. However, its history and production are often misunderstood. Champagne is made in the Burgundy region of France, specifically in the area around the city of Reims. The grapes used are primarily Pinot Noir, Pinot Meunier, and Chardonnay.

Pulpmill Demand Increasing

The demand for pulpmill products is on the rise, driven by increased usage in the paper and packaging industries. This has led to an increase in the price of pulp and paper.

Recognition for a Professional

John A. Cain, CLU, has earned two of the highest honors awarded annually in the life insurance field:
- National Quality Award
- National Sales Achievement Award

These honors are in recognition of his outstanding achievement in life underwriting and excellence in service to his policyholders.

Christmas Tree Lights and the Energy Situation

In the era of remote works, people are more concerned about the energy situation. SMITH-CORONA supports the President's national energy conservation program and urges its customers to conserve energy to reduce the demand on the energy grid.
