SOMEONE'S "GIFT"

Editorials

Defense Is Vital

The writer wishes to express the opinion that the public awareness of the importance of defense is vital. The public must understand the threats that face the nation and the necessity for preparedness. The author suggests that the government should increase defense spending and provide better resources to the military. The public should also be educated about the importance of national security and the consequences of war.

Young People

The success of young people today depends on their ability to make independent decisions and take responsibility for their actions. It is important to encourage them to think critically and make informed choices. Parents and educators should provide guidance and support, but ultimately it is up to the young people to make the right decisions for themselves.

Grassroots

MANY young men and women are sleeping on their beds, fully aware of the dangers that face the nation. They are dedicated to the cause of national defense and are willing to make the sacrifices necessary to protect our country.

Carthage Girls Fall To Canton

Replace your old dishwasher with a new KitchenAid for only 299.95 installed.

We'll remove your old built-in dishwasher and install a new KitchenAid Custom for this low, get-acquainted price.

KitchenAid dishwashers have them all:

1. A complete wash system, a 3-arm wash arm that reaches all corners of your drawers and bowls.
2. A powerful, 6000-Watt motor that removes 98% of food from all dishes.
3. A 1-hour wash cycle that makes it possible to wash your dishes quickly.
4. A 15-place setting capacity that can handle the needs of a large family.

In addition to these features, your KitchenAid dishwasher will provide:

- A high-quality stainless steel exterior that will last for years.
- A water-saving system that reduces water usage by 40%.

You can save money and enjoy the many benefits of a new KitchenAid dishwasher.

Gas Tax Labelled 'Highway Robbery'

The 1971 Texas Highway fund balance is at an all-time high, according to the Texas Department of Highways and Public Transportation. The fund, which is used to finance the construction and maintenance of state highways, has been increasing steadily over the past few years. The current balance is estimated to be around $200 million, up from $150 million in 1970. This increase is largely due to the recent growth in the state's economy, which has led to an increase in the number of vehicles on the roads. The state has been able to use this extra revenue to invest in improvements to the highway system, such as new roads and bridges. The department is planning to use the funds to complete several major projects, including the widening of U.S. Highway 77 and the construction of a new bypass around the city of Carthage. The department is also considering the possibility of using some of the funds to fund new projects in the future. However, the department is under pressure to use the funds wisely, as the state's debt is already high. The department is currently working on a plan to ensure that the funds are used effectively and efficiently, and that the projects are completed on time. The department is also working with the legislature to increase the state's share of the federal highway funds, in order to help finance future projects. The department is also planning to increase the state's contribution to the national highway trust fund, in order to help finance federal projects that benefit the state. The department is also considering the possibility of increasing the state's gas tax, in order to help finance future projects. The department is also working on a plan to ensure that the funds are used effectively and efficiently, and that the projects are completed on time. The department is also working with the legislature to increase the state's share of the federal highway funds, in order to help finance future projects. The department is also planning to increase the state's contribution to the national highway trust fund, in order to help finance federal projects that benefit the state. The department is also considering the possibility of increasing the state's gas tax, in order to help finance future projects.
