Building permit data in Carthage dropped dramatically in the last year of the new building season, according to the Carthage Building Department. Last year, a total of 15 permits were issued, compared to 50 in 1973.

The decline in building permits was attributed to a number of factors. First, the high cost of materials and labor led to a decrease in new construction. Second, the high cost of materials and labor led to a decrease in new construction. Third, the recession in the economy led to a decrease in new construction.

The Carthage Building Department is working to address the decline in new construction. The department is offering incentives to encourage new construction, including reduced fees and tax breaks. Additionally, the department is working to improve the availability of materials and labor.
