City Sets New Industrial Water Rate

In addition, the Commission set a special industrial sewer rate based on a minimum of $5 per month, plus $1 per $1,000 of assessed valuation. The rate for the first million gallons of water used would be $1.50 per 1,000 gallons, and for the second million gallons, $2.00 per 1,000 gallons. The rate would increase by $0.50 per 1,000 gallons for each additional million gallons of water used.

Water was the main topic of discussion Monday night during a special and regular meeting of the City Commission.

And while commissioners failed to reach any decision concerning water rates, they did pass a motion that the town be given four more weeks to come up with the $50,000 needed to finish the first phase of the regular water treatment plant.

The meeting was called to order at 7 p.m. by Mayor J. R. Johnson. After the reading of the minutes, the members of the commission proceeded to the regular order of business.

The new rate, which replaces the current rate of 40 cents per 1,000 gallons, will take effect on May 1. The current rate is $1.00 per 1,000 gallons for the first million gallons and $2.00 per 1,000 gallons for the second million gallons. The new rate will be $1.50 per 1,000 gallons for the first million gallons and $2.00 per 1,000 gallons for the second million gallons.

The rate will be applied to all industrial users, regardless of the amount of water used. The rate will be applied to all industrial users, regardless of the amount of water used. The rate will be applied to all industrial users, regardless of the amount of water used. The rate will be applied to all industrial users, regardless of the amount of water used.
