Commissions Will Review Proposed Budget

Public Hearing Is Scheduled For September 22

The proposed budget of $12,273,150 is about the same as last year's budget with the major increase being accounted for by increased Federal funds and insurance expenses. The proposed budget reflects expected expenditures of $12,273,150 that total during 1967-68 which is a budgeted figure of approximately 10% more than last year's budgeted amount.

According to County Auditor Billy George, this difference reflects a normal annual growth pattern for strapped rural counties.

Despite increased taxes, the county still proposes the same tax rate for this year's budget, which is 10 cents per $100 of assessed value with only two funds receiving different portions of the general fund as previously reported.

For the first time in 1967, Bridgeport and Haskell have been separated in the budget. Before this was the case, both Bridgeport and Haskell received funds from the general fund. Now, Bridgeport has been allocated funds from the general fund, while Haskell has been allocated funds from the Bond Fund.

As of the last budget, the county was able to make up the deficit in the general fund. This year, the county is projecting a deficit in the general fund of about $350,000.

Do you really think God will accept that?

"I'd like to help, but I'm just one person."

Maybe you can't help others all by yourself. You're motivated for doing nothing. Join with others who care about adventure or church. There's plenty who can do it together. The second is to wise. In Wisconsin, one religious group set up a half-way house to help women, parents, and children back into the work force. God we worship on earth in the work, and in our help, and in our healing.
