**Seatbelts Can Save Lives**

Says A&M Expert

Will the coming of the car seat belt be the answer to the problem of stopping drivers from getting killed in auto accidents? That’s the question being asked by the engineering faculty of Texas A&M University. They believe that the use of car seat belts can save many lives, and they are working on a new type of seat belt that will be safer than the present one.

**Orient Proves Interesting**

To Carthage Vacationer

Mr. and Mrs. John Smith were visiting Carthage from their home in Dallas. They said that they had never seen such a beautiful place as Carthage. They were especially impressed with the historic buildings and the friendly people.

**200 YEARS OF FREEDOM**

On this 200th anniversary of the founding of the United States of America, let us rejoice as we recall the events which brought about the freedoms we enjoy today. The story of the nation's struggle to preserve freedom is one that has endured, and it will continue to endure. For freedom is a fragile thing and the price of it can come high. Nevertheless, despite the many problems which beset us, we have managed to preserve it for two hundred years. Let us now look ahead, and resolve to keep America free through all the centuries yet to come.
