Local Rainfall
Below Normal

It’s been a dry year in Forth Worth and other neighboring areas. Some areas have received less than the average rainfall. The high temperatures and lack of precipitation have led to concerns about water supplies and potential drought conditions. The current rainfall levels are significantly lower than the long-term averages. The impact of this dry weather on agriculture, freshwater sources, and ecosystems is being closely monitored. Forth Worth has been experiencing below-normal rainfall for several months, which has raised concerns about the implications for future water management. The city has implemented water conservation measures to help address the situation. The overall trend suggests that drought conditions may persist, and continued monitoring is essential.

SHOP CARTHAGE FOR CHRISTMAS

WHY SHOULD YOU SHOP AT HOME?

1. When you shop out of town the sales tax you pay goes to that city, NOT CARTHAGE. Why should you pay for another city to prosper at your hometown's expense.

2. The money you spend turns over 8 times before it leaves the county. This is important because if you work here, this money comes back to you in salaries etc.

3. It costs you money to go out of town to shop. Fuel costs have risen!

4. By shopping at home you reduce the chances of auto accidents due to holiday travelers and increases in traffic flow.
