Buying time for South Korea

An aging population is a major problem in South Korea. The nation's elderly population is increasing rapidly, and this trend is predicted to continue. The government is taking steps to address this issue, but more needs to be done. One suggestion is to encourage young people to have more children. This would help to reduce the dependency ratio and ensure a stable population in the future.

Mike Kelley says

You can’t fool Mother Nature

I recently visited a friend who lives in a rural area. He showed me his garden, which was lush and vibrant with life. I asked him how he kept it so healthy. He said, "I just follow Mother Nature's ways." This made me realize that we cannot control everything. We must learn to live in harmony with nature.

Library looks for volunteers

The Carthage Library is looking for volunteers to help with various tasks, such as cataloging books and assisting patrons. If you are interested, please contact the library at 555-1234.

What Makes You Appreciate
ADVERTISING! ADVERTISING!
YEA!!!

Believe it or not, you, the advertiser, still have plenty to cheer about today. You live within a free enterprise system that permits competition and allows you freedom to stimulate the flow of goods and services in the face of any economic obstacles.

Yet, you hold the key to keeping the economy strong and giving it direction.

While maintaining and even increasing your advertising budget during business downturns, you not only maximize your own chance for stability and growth, you also create the sales that provide payrolls, profits, taxes and all else needed to keep the economy moving.

It wasn’t some kind of mystical force that created your past success — it was you, your ability to make things happen, supported by a strong advertising schedule that worked.

Even in the face of bleak economic forecasts the same holds true: the more you sell, the more you WILL sell.

And that’s the kind of appreciation that will really make you cheer.
