Nine-digit nonsense

You may have to register soon. Everyone seems to be in a hurry to register. In fact, we have to have our numbers ready. The new computer programs require the use of our social security numbers which will be part of our identities. This is a very important issue that we must fully understand. If we don't understand it, we will be at a disadvantage. We must be aware of the potential for abuse and how it could affect our lives. It is important to have a clear understanding of the implications of this new system.

Will success spoil Buckley?

(Brands for purposes of The Monitor's Saturday night the same as our TV shows them. That's why they are on the same page. Is another Dust Bowl possible?

This time of year, farmers must be on the lookout for the possibility of a Dust Bowl. The current drought conditions are a cause for concern, as they may lead to similar conditions in the future. However, it is important to note that the Dust Bowl was a result of both natural and human factors. By implementing sustainable farming practices and investing in research, we can reduce the risk of a similar event. It is crucial to act now to ensure that we don't face a repeat of the Dust Bowl.

Rain nice but more is needed

By WALTER WING

Pennzoil has been ordered by the Railroad Commission to cease its injection of gas into the St. Louis well next Monday night. The order on that well was signed by the commission today and is the result of recent permit applications. It is a well where Pennzoil has been pumping gas for the past year. The injection of gas is done to maintain the pressure in the well and to keep the gas from escaping. The order will be effective next Monday night and will remain in effect until the company has obtained a new permit for the well. The company has been asked to keep the well shut down until the new permit is obtained. The company has been operating the well for the past year in accordance with the commission's rules and regulations.
