$4.7 million county budget proposed

The county budget totals
$4.7 million, and reflects a 27%
percent increase from the previous year. The
budget includes new services and programs,
along with increases in personnel and equip-
ment. The county has also added a new
position, the budget officer, to manage the
budget process.

The budget includes funding for various
projects, including road improvements,
public safety, and education. The county
will also allocate funds for capital projects,
such as building renovations.

While some departments saw decreases in
funding, others received increases. The
budget includes funding for additional
personnel to support the growing population
in the county.

Overall, the budget is designed to provide
the services needed to support the county's
growing population and infrastructure.

were well attended, and the atmosphere
was lively and energetic.

received numerous compliments on
their efforts to create a memorable

Regretted by permission of the Minneapolis Star, we have recently been informed that all of its people have gone out on strike and the newspaper is not being published. This is a regretted occurrence. We understand that paper expenses have been heavy, however, and the company is endeavoring to keep the workmen on the job.
