A simple solution

By Vic Parker

Ranchers, not making up their minds about where they want to put their stock, are nearly as bad as city dwellers who don't know when to buy and sell. It's not just a matter of trying to figure out whether to buy or sell at the right time, but also of deciding where to put the stock. Ranchers often make the mistake of not planning ahead and waiting until the last minute to make a decision. This can lead to costly mistakes and can even result in losing money.

The joke's on...

By Jeff Loudy

I met a few people at a recent dinner and was struck by the fact that they seemed to have their heads in the clouds. One of them said, "I just can't stop thinking about the future." This is a common problem, and it can be difficult to break the cycle. However, it's important to remember that the future is not something we can control. We can only control our own actions and decisions, and by making good choices, we can create a better future for ourselves.

Child abuse ignorance makes response difficult

By MARLENE ARBART

Child abuse is a serious problem, and it's important to take a proactive approach to dealing with it. However, one of the biggest challenges is that many people are unaware of the signs of abuse and don't know how to respond. This can make it difficult for those who are affected to get the help they need. It's important to be educated about the signs of abuse and to know how to respond in a way that is helpful and supportive.
