Animal control back on city agenda

Robert Dobbins
News-Herald

The suspended Animal Control program in Panola County will be back on the agenda for Monday night’s meeting of the city council. The program was put on hold in January due to the lack of a director and funding issues. The city council had previously approved a budget item for the program, but it was not implemented. The Animal Control program is important for the community as it helps control the number of stray animals and ensures the safety of pets and their owners. The program provides services such as animal control enforcement, stray animal impoundment, and pet licensing. With the program back on the agenda, it is hoped that the city council will take steps to ensure its implementation and effectiveness.
