Two men die in area wrecks

By Earl Chestnut

Two men were killed recently in separate accidents Sunday night and Monday afternoon. One accident involved a motorcycle, and the other was a motor vehicle.

The death of Vance Lee (in the Sunday night accident) was brought on by the sudden stop by a motorcycle he had driven into a ditch while traveling on Greensboro Road near Highway 149.

The rider of the motorcycle, who was one of the county's popular young men, was pronounced dead at the scene of the accident.

The second accident occurred Monday afternoon near Beaufort and New Road in the town of Gurley. Two men in a car were killed in a head-on collision with another car.

Youngster found safe and sound, almost

By Earl Chestnut

Three-year-old Josh Bryant, who disappeared late Wednesday afternoon while playing in the yard of his home, was found safe and sound Thursday afternoon.

Josh, who was reported missing by his mother, was spotted by a passing car near his home. The car pulled over and the occupants of the car, who were searching for Josh, found him playing in the yard of a nearby house.

Midnight fire destroys home

By Malcom Jones

The home of the Bob Speak family on home south of Corrigan died after midnight Sunday.

The family of four was killed in the blaze. The house was destroyed by the fire and the car was also destroyed.

Younger brother of the family, who was staying at the house at the time of the fire, was killed in the blaze.

Survey eyes poultry potential

A survey is to attempt to determine the potential of the poultry industry in Florida. The study will be conducted by the United States Department of Agriculture.

The study will be conducted by a team of experts who will visit poultry farms in the state. The results of the study will be used to determine the potential of the poultry industry in Florida.

Group plays war games for fun

By Earl Chestnut

Amorcon, a fairly large group of high school kids, has been playing war games for several weeks. The group meets every Friday afternoon to play war games.

The group is made up of about 15 kids, mostly from the local high schools. They meet in the community center and play war games for about two hours.

The group plans to continue playing war games for the rest of the year.

A LOOK AT IMPORTANT ISSUES FACING PANOLA COUNTY TODAY

Editorial:

New court mandatory?

It is interesting that hard officials are now asking the local electorate to approve funding for a new court, and in the same breath, evaluate the need for the new court. Many times, when a new court is asked for, the officials request funding for the new court, but never consider the need for a new court.

In 1992, the official court judge in Panola County was indicted and later convicted of several counts of fraud and abuse of office. In response to this, the electorate approved funding for a new court, which is now operational.

Now, in 1993, the official court judge in Panola County is facing another set of allegations, and once again, the electorate is being asked to approve funding for a new court.

The question is, why is the electorate being asked to approve funding for a new court when the current court is facing allegations of fraud and abuse of office?

Good excuses are sure hard to come by

By Earl C. Crolley

This is a good excuse for many things, but I believe it's hard to come by. Excuses are easy to make, but it's hard to come by good excuses.

For example, if you break a lamp and say, "It was my fault," that's an excuse. But if you break a lamp and say, "It was the cat's fault," that's a good excuse.

The same goes for court judges. If a judge says, "It was my fault," that's an excuse. But if a judge says, "It was the cat's fault," that's a good excuse.

The question is, why are court judges having such a hard time coming up with good excuses?

The Gnithill

Rodeo, downtown project efforts lauded

By Paul Best

The Rodeo Board, Downtown Improvement Committee, and the City Council are to be commended for their efforts in promoting the city of Crichton.

The Rodeo Board has been working hard on promoting the rodeo, but it's hard to come by good excuses.

The Downtown Improvement Committee has been working hard on promoting the downtown area, but it's hard to come by good excuses.

The City Council has been working hard on promoting the city of Crichton, but it's hard to come by good excuses.

Talk-Line continued...

TALK-Line 693-8255

By Jim DeLine

I'm calling to reference the previous article regarding the new court. I believe the article is accurate, and I think everyone feels the same way.

There were a few things I would like to add. I would like to say that the new court is a good thing for the community. It will provide a fair and impartial judicial system.

I would also like to say that the new court is being well run. The judges and the staff are doing a great job.

And finally, I would like to say that the new court is a good investment for the community. It will provide a fair and impartial judicial system for years to come.

Thank you for the article.

715 million spent on outdoor sports

Tousers spent an estimated $715 million on sporting goods in 1983, according to a new study by The Texas A&M AgriLife Extension Service. The study is the first of its kind to provide a comprehensive picture of outdoor recreation spending in the state. The study was conducted by a team of researchers from the Texas A&M AgriLife Extension Service and the Texas A&M University System. The study was conducted in 1983.

Outstanding hurler
Ponies sign Teeter

Region VII Poison Control Center serves East Texas

When common factors are explored, it seems unlikely that something as unexpected as a poison control center would be located in a region of the country such as East Texas. However, the fact is that the Region VII Poison Control Center serves a large part of the state.

The center is located in Houston and has been in operation since 1970. It serves a population of over 11 million people in 24 counties, making it one of the largest poison control centers in the country.

The center is staffed by a team of highly trained professionals, including physicians, nurses, pharmacists, and toxicologists, who work together to provide immediate assistance to those who need it.

One of the most common forms of poisoning in this region is that of pesticides. The center receives calls about pesticide poisonings on a daily basis. The staff at the center is well-versed in the effects of pesticides and can provide immediate advice on how to handle the situation.

Another common form of poisoning in this region is that of prescription medications. The staff at the center can provide information on the proper treatment for medication poisoning, including information on how to manage symptoms and when to seek medical attention.

The Region VII Poison Control Center serves as a valuable resource for those in need of immediate assistance in the region. It is a testament to the dedication and expertise of the staff who work to keep people safe from poisoning.
