Biologists study deer, hounds reactions

There was a mild wind movement in the Park on Friday as 100 hounds gathered in the park on Saturday morning as part of the annual gathering of the Panola County Hounds. The event is sponsored by the Panola County Hounds, Inc. and is held in conjunction with the Junior Claymores and the Parks and Wildlife Department. The event involves the use of hounds to locate and track deer, which is an important part of the deer management program in the area. The hounds are trained to follow the scent of the deer and locate them, allowing biologists to study their behavior and population dynamics. The event is open to the public and provides an opportunity for people to observe the hounds in action and learn about their role in wildlife management.
