CISD librarians host area workshop

Carthage librarian, Sandra Haynes, is leading the East Texas library community in a workshop focused on the benefits of the newly developed library management system, LiCIA. The event, held on October 3, is part of the Carthage School District's commitment to enhancing library services. Haynes, along with several other librarians from the district, will discuss the advantages of the new system and how it can improve the overall library experience for students and staff.

About the Workshop:

The workshop is designed to provide librarians with the knowledge and skills needed to effectively manage library resources using LiCIA. The seminar will cover topics such as cataloging, circulation, and user services, with a special focus on how the system can streamline operations and enhance the library's role in the school community. Attendees will have the opportunity to ask questions and receive guidance on how to implement the system in their own libraries.

For More Information:

If you are interested in attending the workshop or learning more about the LiCIA system, contact Sandra Haynes at 254-812-2110. You can also visit the Carthage School District's website for a detailed agenda and to register for the event.
