Writing students win

During the fourth six weeks of our school year, students in each grade were given the opportunity to participate in the Writing students win program. The program, sponsored by the local newspaper, involved writing a story about their favorite place in town. The winners were decided based on the quality and creativity of their writing. The first-place winner was given a $100 gift card to a local bookstore, while the second and third-place winners received $50 and $25 gift cards, respectively.

Texas annexation controversy

The United States announced its intention to annex Texas on July 4, 1836, in the aftermath of the Texas Revolution. The annexation was a matter of much controversy at the time, with some arguing that it was essential for the U.S. to expand its territory and others opposing it due to concerns about the issue of slavery.

Despite these arguments, the annexation was eventually approved by the U.S. Congress, and Texas became the 28th state on December 29, 1845. The annexation raised important questions about the nature of the nation's expansion and the role of the federal government in determining its boundaries.

Texas plans no big changes at high school

Riverside High School will have a new administration this year as the new principal, Mr. Bob Murphy, begins his tenure. The school has been working to improve its academic performance and create a more positive learning environment for students.

Child safety belts installed

Software Systems has announced that it has launched its child safety seat belt line, a product that will be available in all vehicles by the end of the year. The new system uses advanced technology to provide greater comfort and ease of use for parents and children alike. The National Safety Council recently released a report stating that children under the age of four are at the highest risk of injury in car crashes. The new seat belt is designed to be more comfortable and easier to install, making it a safer choice for families. The National Safety Council recommends that parents always use child safety belts when driving with their children, regardless of age or weight.
