City of Carthage, July 16, 1987

Carthage ISD workers and contractors were busy Monday trying to get trenches dug next to the high school gymnasium area to prepare to tie in to carry off water from beneath the basketball court. The floor of the court will be taken up, a mixture of water and dirt that filled the trenches and the floor will be cleaned down again. But work with the idea that they'll carry off water before it becomes a problem again. The project is costing $300,000.
