A domestic dispute between two Tyson employees resulted in a shooting Friday that left one of the men seriously injured and the other in an attempted murder charge. Wiley F. James Jr., 28, of Marshall, was listed in satisfactory condition Tuesday with a bullet wound in the right side of his face. The other suspect, Donald Tyrone Carline, 25, also of Marshall, is being held in the Panola County Detention Center in lieu of a $5,000 bond.

The shooting occurred at the Tyson poultry processing plant in Carthage about 5 p.m. when Carline reportedly shot Jones with a 25-cal. rifle. Jones was taken to the hospital and later flown to a Dallas hospital for treatment.

Bush tries to win Hispanics

By Linda Wilkins

WASHINGTON (AP) — George Bush pushed a Delta flight to Kansas City to support his presidential campaign today as he continued to court Hispanics, a key swing voter bloc in the November elections.

The flight was the second of three the Republican presidential candidate made to Hispanic communities, following similar flights to Los Angeles and Chicago.

Bush, who has consistently and strongly supported the Republican Party's position on immigration, said he was concerned about the impact of illegal immigration on the economy and the quality of life in the United States.

In his speech today, Bush emphasized his commitment to enforcing the law and making sure that illegal immigrants are treated fairly and with dignity. He also stressed the importance of creating a path to citizenship for those who are currently undocumented.

In an effort to appeal to Hispanic voters, Bush has been actively courting the Hispanic community, holding a series of events and meetings with leaders from the community.

His campaign has also invested in resources specifically targeted towards Hispanic voters, including polls and digital ads that focus on issues important to the Hispanic community.

The Republican National Convention, which will be held in August, has been critical in determining the nominee for the Republican Party. The party has a majority of delegates, and the nominee will be determined by the convention.

Bush's campaign has been working to secure the nomination, with several key endorsements from important figures within the Republican Party.

In recent weeks, Bush has also been focusing on the issue of healthcare, which is a major concern for Hispanic voters.

With the election just a few months away, Bush's campaign will continue to work to increase his support among Hispanic voters, with a focus on issues that are important to this key swing bloc.

NOTICE TO WATER CUSTOMERS OF THE CITY OF CARTHAGE, TEXAS

The United States Environmental Protection Agency (EPA) has adopted regulations that all public water systems notify their customers of lead exposure. This notification is intended to educate and inform consumers on this issue in light of the fact that your drinking water may pose a potential health risk. This is being done even though your water system is not in violation of the maximum lead level standard. The purpose of this notification is to inform you of the potential adverse health effects of lead. It is being done even though your water system is not in violation of the current standard.

EPA and others are concerned about lead in drinking water. Too much lead in the human body can cause serious damage to the brain, kidneys, and other body systems and is a blood cells. The presence, even with short-term exposure, is in young children and pregnant women.

Law levels in your drinking water are likely to be:

- If your home or water system has lead pipes, solder, or lead water service line, use lead safe procedures.
- If your home has copper pipes with lead solder, or lead service line, the risk of lead in your drinking water may be the highest.
- If your home has lead pipes, avoid using hot water and use cold water for drinking and cooking.
- If your home has lead pipes or services line, water should be flushed for at least 30 seconds before using.
- If you have lead pipes, the risk of lead in your drinking water is the highest.

Ways to avoid potential lead exposure are to "flush" faucets before using hot water for drinking and cooking. You may wish to have your home's water tested in order to determine if lead is present. For more information, contact your local health department or the EPA's Lead Hotline at 1-800-424-LEAD.
