**To all customers of**

Southwestern Bell Telephone Company:

**Public Notice**

On July 2, 1989, Southwestern Bell Telephone Company received the Public Utility Commission of Texas’ approval to implement a change in customer rates. The new rates provide for a slightly lower rate on longer local calls, and a slightly higher rate on shorter local calls. This change is in response to the customer’s request for a more fair and equitable rate structure. The new rates will take effect on August 1, 1989. The new rates are designed to ensure that customers are charged fairly for their usage, and to reflect the true cost of providing the service. Customers are encouraged to review their usage patterns and to consider whether they need to make any changes to their calling habits to minimize their costs. Customers who have any questions about the new rates or who would like more information about the changes are encouraged to contact Southwestern Bell Telephone Company at 512-489-0232.
