Positive outlook urged at development banquet
Mail hike is unjustified

The Postal Service's recent announcement of a rate increase is a move that will only exacerbate the existing problems facing the agency. The increase is expected to result in higher costs for consumers, which will further strain the already struggling postal system.

In a time when many Americans are already struggling to make ends meet, this additional expense is a significant burden. The recent pandemic has placed an unprecedented strain on the Postal Service, leading to delays in delivery and a decrease in service quality. This has resulted in increased customer dissatisfaction and a decline in the agency's reputation.

Postal workers have been working tirelessly to maintain service levels despite the difficulties posed by the pandemic. However, the recent rate increase will only add to their workload and stress, making it even more challenging to provide the level of service that customers deserve.

The Postal Service is an essential service that plays a crucial role in our daily lives. It connects us with friends, family, and businesses, and is a vital component of our economy. The agency should not be allowed to continue operating in the red, and it is time for policymakers to take action to stabilize the organization.

In conclusion, the recent rate increase announced by the Postal Service is unjustified and can only lead to further problems. It is time for us to support our postal workers and work towards a sustainable solution for this important institution.

Emmanuel wins 79-64 in meet

Top-ranked team takes Fillies out

Emmanuel took care of business with a 79-64 win over Fillies last week. Emmanuel put up a 20-point lead after 2.5 quarters, and the Fillies never recovered. The game was a battle of two teams with top ranks in the region, but Emmanuel emerged victorious, despite Fillies' efforts to close the gap. Emmanuel used their height advantage and strong defense to overpower the Fillies and secure the win.
