McDaniel resigns college presidency

By LAURA NEHEZ

Dr. Gary McDaniel, Monday night announced his resignation as president of East Texas Baptist University, effective at the end of the academic year. McDaniel, who is a native of Cleveland, Texas, has spent 31 years in Higher Education and has served as President of ETBU since 1990.

The decision to resign was made after a period of reflection and discussion with the Board of Trustees. McDaniel expressed his gratitude for the opportunity to serve as President of ETBU and expressed his commitment to the continued success of the university.

The Board of Trustees has appointed Dr. Paul J. Thomas, Jr. as interim president effective immediately. Dr. Thomas, who has served as Executive Vice President and Provost since 2014, has a wealth of experience in higher education administration.

Board delays action on auditor bids

Pamela G. Cooper

The Board of Trustees of East Texas Baptist University will review the auditor's report and consider the auditor's recommendations at its next meeting.

The board received bids for the annual audit of the university's financial statements for the fiscal year ending June 30, 2023. The bids were submitted by two firms, one of which is currently auditing the university's financial statements.

The board discussed the pros and cons of each firm and is expected to make a decision on the auditor at its next meeting.

Weather prompts blackouts for Area

Lightning strikes cause widespread power outages across Central Texas.

PGH plan put before public

Public Hearing on the PGH (Public Gas Hollywood) project is scheduled for next week.

The public hearing is set for 6:30 p.m. on Tuesday, July 25, at the PGH office located at 123 Main Street. The public hearing will be preceded by a presentation of the PGH project by its spokesperson.

The presentation will include a review of the project's goals, objectives, and anticipated benefits. The public will have an opportunity to ask questions and provide comments.

Lease proposal used as incentive

A lease proposal is being used as an incentive to attract new businesses to the area.

The lease proposal offers a variety of incentives to businesses that choose to locate in the area. The incentives include rent reductions, tax credits, and other financial incentives.

The proposal is expected to be presented to the local government for approval. Once approved, the leases will be offered to businesses that are willing to locate in the area.

Man dies in wake of tragic accident

Life is a series of accidents that happen to us. Some accidents are minor and do not cause any harm, but others are more severe and can have lasting effects.

The most recent accident that has shocked the community is the death of a young girl who was hit by a car while walking home from school.

The car, a 2018 Honda Accord, was stopped at a red light when the 12-year-old girl stepped into the street. She was pronounced dead at the scene. Police are investigating the incident to determine the cause of death.

Saving a Panola County landmark

The Old Macedonia Cemetery

According to a local source, the Old Macedonia Cemetery was established in 1836 by a group of African Americans who were freed from slavery. The cemetery is located in the historic area of Macedonia, which was once a thriving community that supported agriculture and commerce.

The cemetery is a significant landmark because it contains the remains of many African Americans who played important roles in the history of Panola County. The cemetary is a place of reflection and respect for the community's past.

Local rebate figures drop sharply in July

By CHARLES SNEAD

The old Macedonia Cemetery lies on a hill overlooking the city of Panola, Texas. It is a peaceful and serene place, a testament to the lives of those who rest within its walls. The cemetery is surrounded by a fence, and a sign at the entrance reads, "The Old Macedonia Cemetery."

But is the time now to think about the future of the cemetery? The cemetery is in need of repair and renovation, and the issue of its preservation is becoming a concern for the local community.

The Old Macedonia Cemetery has a history that is rich with stories of hardship and struggle. The cemetery was established in the mid-19th century, a time when African Americans were facing discrimination and prejudice.

The cemetery is a place of reflection and respect for the community's past. It is a place where people come to remember and honor those who have come before them. The cemetery is a place where people come to find peace and solace.

But is the time now to think about the future of the cemetery? The cemetery is in need of repair and renovation, and the issue of its preservation is becoming a concern for the local community.

Dow is stock market's barometer

by Kevin Glovacek

The Dow Jones Industrial Average (DIA) is one of the most commonly cited market indicators. It is a price-weighted index of 30 U.S. stocks that are considered to be leaders in their respective industries. The DIA is calculated by taking the closing price of each stock and then dividing that by a base value of 20. This is often referred to as the "simple" method of calculation.

The DIA was created in 1896 by Charles Dow, a financial journalist, and his colleagues. The original index consisted of 12 stocks, and it was designed to provide investors with a simple way to track the performance of the U.S. stock market. Over the years, the DIA has grown to include 30 stocks, and it is now one of the most widely followed market indicators. The DIA is also used as a benchmark for other stock indexes, such as the S&P 500 and the NASDAQ Composite.

The DIA is calculated using a simple average of the closing prices of the 30 stocks in the index. The index is then adjusted to reflect any changes in the underlying stocks, such as stock splits or changes in the number of shares outstanding.

The DIA is often used as a measure of the overall condition of the stock market. When the DIA is rising, it is generally seen as a sign that the market is performing well, while a declining DIA is often seen as a sign of a weaker stock market.

In addition to the simple average method, the DIA can also be calculated using a more complex method called the "base weighted" method. This method takes into account the size of each stock in the index, which is determined by its market capitalization. The DIA is calculated by taking the closing price of each stock and then multiplying it by the number of shares outstanding. The results are then added together and divided by the total number of shares in the index.

The DIA is often used as a benchmark for other stock indexes, such as the S&P 500 and the NASDAQ Composite. It is also used as a measure of the overall condition of the stock market. When the DIA is rising, it is generally seen as a sign that the market is performing well, while a declining DIA is often seen as a sign of a weaker stock market.

LEWISPORT — Public Health officials say the fast-growing numbers of weekly cases of COVID-19 continues to strain the state’s healthcare system.

"It’s a very challenging time," said Dr. Craig Dearden, state epidemiologist. "We’re seeing a significant increase in cases, and that’s putting a lot of stress on our hospitals and healthcare providers."

MARTIN — Kendra Montgomery, 11, was born with a rare genetic condition that affects her muscles. She has cerebral palsy.

"Kendra is a fighter," said her mother, Jennifer Montgomery. "She’s always smiling, and she’s always happy. She loves to dance, and she’s really good at it."
Texas water supply being threatened

The Texas water supply is being threatened by relentless expansion of urban areas and their demands for water and energy. As the population grows, the need for clean water and usable land increases. This can result in conflicts between development and conservation efforts. Communities must find ways to balance these needs to ensure a sustainable future.

Genealogical Society to meet today at THS

The Genealogical Society will meet today at 10 a.m. at the Thomas High School. Attendees are encouraged to bring their family history documents to share and discuss. The society meets monthly to discuss genealogy research and to learn from experts in the field.

Our readers write

Dear Editor:

I have been following the developments in the Texas water crisis and was struck by the parallels with the situation in my hometown. It is essential that we work together to find solutions that balance the needs of development and conservation.

Sincerely,

Texas tightens the spigot

Texas has tightened its grip on the water supply by limiting water usage in certain areas. This is part of an ongoing effort to ensure the sustainability of the state's water resources.

---

Our readers write

Dear Editor:

I strongly believe that conservation efforts should be increased to address the Texas water crisis. We need to make changes now to ensure that we have clean water for future generations.

Sincerely,
