CISD test scores soar
Test results above state average

By LAURA NEHRICH

Several hundred of the district’s high school students and teachers
gathered at the monthly CISD board meeting in the CISD administration
district on Thursday, October 22, to hear the results of the Texas
School Performance Index (SPI) for the 1998-99 school year. By
comparison, the SPI assessment was conducted in 1999.

The Texas Education Agency (TEA) announced the SPI scores for
all school districts in the state, including their test results and
ratings. The district APIs are an indicator of the overall achievement
level of students in a particular school district.

This is the second year for
CISD to take the test, in which
the student performance of
the TAE, which requires at least a
30 percent score in mathematics
reading, science, social studies, and
taking of the test in the fall of 1999.

The results were released
on October 22nd, the day before
the district’s API scores were
announced. The API scores are

The Farley-Wilson Grammar School located in Denton, Texas, will
be one of the first public schools in the United States to implement
an innovative teaching method, known as the Expeditionary Learning
(EL) approach. The program, developed by the New Generation
Schools network, aims to provide a more engaging and personalized
teaching environment for students.

The structure of the EL approach
includes several key components:

1. **Project-based Learning**: Students engage in extended
research projects that are driven by real-world problems or
interests. These projects can range from simple hands-on
activities to complex investigations that span multiple
weeks or even months.

2. **Collaborative Learning**: Students work in diverse
learning groups (MGs), where they are encouraged to
interact, support each other’s learning, and develop
cooperative problem-solving skills.

3. **Self-directed Learning**: Students take ownership of
their learning through goal setting, self-assessment, and
reflection. This approach empowers students to
actively shape their educational experiences.

4. **Assessment for Learning**: Frequent and formative
assessments are used to continuously evaluate students’
understanding and adjust instruction accordingly.

The Expeditionary Learning approach is based on
the premise that effective education should provide
students with meaningful opportunities for
personal growth and development. By adopting
this method, the Farley-Wilson Grammar School
seeks to transform traditional schooling into
an engaging and student-centered learning environment.

WE SHOULD MAKE GOOD USE OF EACH DAY ON OUR CALENDAR

The calendar, for all its faults, provides a great many opportunities. You can use the calendar to encourage your family to do something fun each day. You can use it to keep track of important events such as birthdays, anniversaries, and holidays. You can also use it to keep track of your work schedule and appointments. The calendar is a wonderful tool that can help you stay organized and on track.

The calendar also serves as a reminder of the importance of taking time to enjoy the little things in life. It's easy to get so focused on work and other responsibilities that we forget to take time to appreciate the simple pleasures. By incorporating the calendar into your daily routine, you can create opportunities to enjoy the little things. For example, you could plan to take a walk in the park on a clear day or to have a family movie night on Saturday evenings.

In addition to its practical uses, the calendar can also be a source of inspiration and motivation. You can use it to set goals for yourself and track your progress towards achieving them. You can also use it to remind yourself of the importance of taking care of yourself. By incorporating the calendar into your daily routine, you can create a system for achieving your goals and maintaining your well-being.

So let's make good use of each day on our calendar and make the most of the opportunities it provides. Let's take time to enjoy the little things in life and remember the importance of taking care of ourselves. And let's use the calendar as a tool for achieving our goals and maintaining our well-being.
