healthy diet are less
likely to develop
heart disease.

Early detection important

By LAURA NEUBURGER

Every day brings us one
step closer to the
early detection of cancer.

Cancer is the second
leading cause of death in
the United States, after heart
disease.

Screening can help detect
the disease early, when it is
more treatable.

The American Cancer
Society recommends
screening for breast cancer
for women ages 40 and over.

For children, there are
screening programs for
cancer of the skin, mouth,
and other areas.

The key to early detection
is awareness.

For more information,
contact the American Cancer
Society at 1-800-227-2345.

There's Only One Hawthorn Funeral Home

Of all 22,000 funeral homes in the United States, only a select number stand out. The fact that Hawthorn Funeral Home is one of them is no surprise.

Hawthorne is part of two well-respected funeral service associations by invitation only, the International Order of the Golden Rule and National Selected Morticians.

Only one Golden Rule funeral home can serve the Cabbagetown area. That Golden Rule funeral home is Hawthorn Funeral Home. A good name to remember for compassionate care.
