Panola County loses K-9 cop Rolf

Award-winning dog served community well

The Panola County Sheriff's Office announced the loss of one of their most beloved K-9 officers, Rolf. Thesheriff's office mourns the loss of Rolf, a three-year-old German Shepherd, who passed away this week from natural causes.

"Rolf was an integral part of our team and served the community well," Sheriff Mike Hopper said. "He was a dedicated and loving companion to our deputies and a true asset to our team."

Rolf joined the Panola County Sheriff's Office in 2019 as a K-9 officer and quickly became a favorite among the community. He was known for his exceptional tracking abilities and his ability to locate missing individuals.

The sheriff's office is actively seeking the replacement of Rolf, and will begin the search process immediately. Remember, Rolf will be missed by many and we will continue to honor his service to the community.

Thomas awaits word on grants

College of the Virgin Islands has applied for a grant to receive a new K-9 officer, with the hope of replacing Rolf. The grant application process is expected to take several months.

"We are excited to see if we will receive the grant," Sheriff Hopper said. "Rolf was an integral part of our team and we are working hard to ensure that we have the resources to continue serving the community."

Understanding value helps in stock selection

By Tom Gordan, CFP

When selecting stocks, investors often look for those firms with the highest price-to-earnings (P/E) ratio. However, this strategy may not always be the best one. In this article, we will explore other factors to consider when selecting stocks.

Another method of evaluating a stock's value is by calculating its book value. Book value is a measure of the company's net worth. To calculate book value, you subtract the company's liabilities from its assets. A high book value indicates that the company has a significant amount of assets that are not reflected in its market value.

On October 15, 1967, the stock market crash in Europe took place, which had a significant impact on the value of stocks. However, the crash was not due to a downturn in the stock market but rather to the oil crisis. The crash caused the value of stocks to drop significantly, making it important for investors to understand the factors that can affect stock values.
