ADA could cost city big bucks

Cortland City Comissioners are considering a potential lawsuit against the city during regular sessions that would bring the city into compliance with the Americans with Disabilities Act (ADA). The lawsuit, if pursued, would include a new police station and a remodeled City Hall.

Although no final action has been taken, the city could spend up to $10 million on the project—more than four times its total budget. The city is currently operating with a substantial budget deficit, and the potential cost of the ADA compliance could have a significant impact on the city's financial stability.

The cost of compliance would not be a burden on the city's budget, as the funds would be allocated from existing reserves.

The coalition of concerned citizens would be formed to push for ADA compliance, and the city would be required to pay for the legal proceedings.

County treasurer decides to retire

Pamela County Commissioner Pauline Anderson announced her retirement effective the end of this month. Anderson served the county in various capacities for 15 years.

"I decided to retire," Anderson said. "I believe it's important for the county to have new leadership that can bring fresh ideas and new perspectives to the table."

Hospital zoning request tabled

Pamela County General Hospital's request to expand its hospital facilities was tabled on Monday morning. The hospital is seeking to expand its service area to serve more residents in the county.

"I believe it's important for the hospital to expand," said Commissioner John Williams. "It will provide better access to healthcare for our residents." However, the request was tabled due to concerns about the impact on traffic in the area.

Brown honored with state award

Brown was honored by the State of New York for her work in education. She received the award during a ceremony at the State Capitol.

"I am honored to receive this award," Brown said. "I believe in education and the importance of investing in our future leaders."

Annual ag banquet to be held Thursday

The USDA Food and Agriculture Commissioner will host an annual ag banquet on Thursday evening. The event is expected to attract dozens of agricultural leaders from across the state.

"I am excited to host this event," said the Commissioner. "It is an opportunity to celebrate the hard work and dedication of our agricultural leaders."
Caribbean visitors find welcome in Carthage
British Virgin Islands to copy local incinerator

By LULU HABED

The visitors' first view of Carthage is a sight to behold. The town, which has been preserved from the effects of nature for centuries, is a testament to the hard work and dedication of the community. The visitors are greeted by a warm and friendly welcome, and the locals are more than happy to provide them with all the information they need.

Planning for retirement
Financial Focus

By Tom Gorden, CFP

Planning for retirement is not a one-time event; it is a lifelong process. It is important to start planning for retirement early to ensure a secure future. There are several factors to consider when planning for retirement, such as your life expectancy, your current financial situation, and your goals.

Exit level TAAS test set for CBS

The senior administration of Carthage School District plans to implement an exit level TAAS test for CBS. The test is designed to ensure that students are prepared for college and career readiness. The test will be administered to all students in the district and will be based on the state's college and career readiness standards.

Reunion held by Essary families

The family of the late Robert Essary is holding a reunion on May 15 at the Carthage Country Club. The reunion is open to all family members and guests. The event will feature a buffet lunch, a speech, and a photo gallery.

PERSPECTIVES

Figuring it out ain't usually very easy

By JIM GRUEN

It was the recruitment of a new employee in your local bank that got me started on this brief essay. You know, from the time a bank hires a new employee it becomes a new entity. A bank is a collection of people. It's a collection of personalities, all of whom bring their own perspectives to the job.

So here's the scenario: A new employee has just been hired for the bank. She's young, bright, ambitious, and determined to make the bank a success. She's been working hard, learning the ropes, and making contributions to the team. She's also starting to feel a little overwhelmed by the workload.

It's easy to see how things can get out of hand in a bank. There are so many variables to consider, from customer service to financial planning. And with so many people involved, it's easy to lose track of the big picture.

But there's a way to overcome these challenges. It's simple, really: you need to focus on the fundamentals. Make sure you understand the basic principles of banking. And then you need to apply those principles to your work.

Unquestionably, it's not easy to figure out what the big picture is. But with a little thought and effort, you can make it happen. And when you do, you'll find that the results are well worth the effort.

Well, well, we give you the big picture.

Rolling Thunder

The phrase "Rolling Thunder" likely refers to a real-world event or organization. "Rolling Thunder" is a terms used to describe a crisis or conflict, especially in the context of war or political unrest.

Unfortunately, the phrase "Rolling Thunder" is often associated with negative connotations. It can be used to describe a situation where things are escalating rapidly and becoming increasingly dangerous.

But it's not always the case. Sometimes, "Rolling Thunder" can also refer to a situation where things are improving and becoming more stable.

In the context of a bank, "Rolling Thunder" could refer to a situation where the bank is facing challenges, but is working to overcome them.

One Vestal Report said she ran a company called "Rolling Thunder." This was a company that offered financial services to clients. The company was run by a woman who was described as a "Rolling Thunder." This was likely a reference to her personality, which was described as passionate and dynamic.

The phrase "Vestal Report" likely refers to a column or series of articles written by a journalist or commentator. It's possible that the journalist or commentator was named Vestal, and that she wrote about a company called "Rolling Thunder." The phrase "Vestal Report" could also refer to a popular expression, or a well-known saying.

Lehmann Eye Center says, ‘Welcome to’

Dr. Smith!

Robert P. Lehmann, M.D., announces the association of Shannon Lee Smith, M.D., a board-certified ophthalmologist, with Lehmann Eye Center. “We are indeed fortunate to have Dr. Smith bring her training and skills in neuroophthalmology and myasthenia gravis to our practice,” said Dr. Lehmann. Smith received her medical degree from the University of Texas Medical Branch at Galveston where she did her internship in pediatrics. She did a fellowship in ophthalmology at Baylor College of Medicine in Houston and completed her ophthalmology residency at UTMB. She most recently practiced with Glaucoma Associates of Texas in Dallas for the past 2 years where she received her fellowship in glaucoma.

Dr. Smith has made scientific presentations to various professional groups including the Association for Research in Vision and Ophthalmology, UTMB Alumni, the American Association of Certified Ophthalmic Nurses, and the American Society of Ophthalmic Technology Specialists.

ntation

Agonization

Agonization is the process of becoming agitated, anxious, or distressed. It is a state of discomfort or distress resulting from internal or external pressure. Agonization can be caused by various factors such as physical pain, emotional stress, or environmental stressors.

Neovascularization

Neovascularization refers to the growth of new blood vessels. It can occur in various contexts, such as in the retina (neovascular retinopathy) or in chronic wounds. Neovascularization is often associated with increased blood flow and can be a sign of inflammation or tissue damage.

Neuronal Loss

Neuronal loss refers to the death of neurons, which can result from various pathological conditions such as neurodegenerative diseases (e.g., Alzheimer's disease) or injury to the nervous system.

Nearsightedness

Nearsightedness, also known as myopia, is a condition in which the eye focuses images in front of the retina, causing vision to be blurry at a distance.

Near Vision

Near vision refers to the ability to see objects that are close to the eye. It is normally used for activities such as reading or sewing. Near vision is different from far vision, which refers to the ability to see objects that are far away.

Ner vous System

The nervous system is a complex network of nerves that control bodily functions and transmit signals throughout the body. It includes the central nervous system (CNS), which consists of the brain and spinal cord, and the peripheral nervous system (PNS), which consists of the nerves that extend from the brain and spinal cord to the rest of the body.

Nerve Stimulation

Nerve stimulation is a technique used to induce electrical activity in the nerves. It can be used for various purposes, such as for pain management or to facilitate muscle movement.

Neurotransmitter

Neurotransmitters are chemical messengers that are released by nerve cells to communicate with other cells. They play a crucial role in various physiological functions, including mood, movement, and memory. There are several types of neurotransmitters, each with its own specific role.

Neurotrophic Factors

Neurotrophic factors are growth factors that promote the survival, growth, and function of nerve cells. They are essential for neurodevelopment and play a role in the repair and regeneration of neural tissue after injury.

Neurovascular System

The neurovascular system is a network of blood vessels that supply the brain, spinal cord, and peripheral nerves. It plays a critical role in delivering oxygen and nutrients to the nervous system and removing waste products.

Dr. Lehmann first in area to offer “Duo” RK method

Robert P. Lehmann, M.D., offers the latest RK technology and instrumentation with the new “Duo Method of Radial Keratotomy.” Radial Keratotomy, or RK, is the permanent correction of nearsightedness and astigmatism resulting from an improperly shaped and sized cornea. The “Duo Method” uses two separate techniques: the Russian technique and the American technique. Dr. Lehmann found that by combining the two methods, he is able to correct patients up to 8.00 diopters.

The Russian technique is the most frequently performed method and is based on the principle of creating a series of radial incisions in the cornea. These incisions stretch from the center of the cornea to the edge, creating a series of tunnels that deform the cornea, thereby correcting the nearsightedness.

The American technique, on the other hand, involves creating a series of horizontal cuts in the cornea. These cuts are made approximately 3 mm from each other, creating a series of “flaps” that can be moved to correct vision. Dr. Lehmann found that by combining these two methods, he is able to correct patients up to 8.00 diopters.

Glucoma: Regular exams may prevent permanent loss of eyesight

Dr. Sam Smith, 25, was diagnosed with Glaucoma, a disease that progressively increases the pressure in the eye. He is now being monitored closely by Dr. Lehmann for any signs of progression.

Corneal ‘Mapping’ New technology now available at Lehmann Eye Center

A system to map corneal curvature and provide a computerized, color-coded map of the corneal surface is now being used at Lehmann Eye Center. According to Dr. Lehmann, “the system identifies thousands of points on the cornea and then computes them to standardized curvatures to produce a topographical map of the area. This system also allows the capability to view previous ‘maps,’ and provides an enhanced contactless measurement for patients whose eyes are too sensitive for traditional methods.”

Catarrh Surgery on ‘hit list’ By Robert P. Lehmann, M.D.

It is now possible for patients to have visual correction surgery for corneal distortion caused by cataracts. The procedure, called Catarrh Surgery, involves the use of a laser to reshape the cornea, allowing patients to achieve a more natural vision.

Corneal topography is another advancement, and we are proud to be at the forefront in the area to offer this technology,” said Dr. Lehmann.
