Compromising ourselves to death

It is said, 'The Age of Con-
sciousness' has come. The
people are waking up to the
truth of what is happening in
the world. They are see-
ing through the lies and de-
humanizing practices of the
powerful. The people are no
longer willing to be slave to
the few, nor to the power of
money. They are ready to
rise up and take back what
is rightfully theirs.

But the forces of the o-
perating system are not
willing to let go. They are
using every means at their
disposal to maintain their
control. They are using fear,
confusion, and division to
keep the people from seeing
the truth.

The people must remain
aware and active. They must
continue to educate them-

self and others about what
is happening. They must
continue to stand up for
what is right and just.

The Age of Consciousness
is here. The people are
awakening. But the forces
of the operating system
are not willing to let go.
