Cost of program concerns PC board

By LAURA NEGRIS

PC board reportedly will consider a proposal for a medical record pro-
gram at the meeting. The proposal is said to be a "no-lose" proposition for
the hospital and the patients.

The proposal is under consideration by the medical record committee of
the PC board. The committee has been trying to find a way to reduce the
cost of the program, which has been a source of concern for many years.

PC board Chairman Dr. Leonard Golden said he was "pleased to see the
progress being made on the medical record program."

The proposal includes the creation of a medical record center, which
would be located in the hospital's main building. The center would be
open to the public and would provide access to medical records for a
small fee.

The medical record center would also be available to patients who
have been discharged from the hospital. This would allow patients to
access their medical records at any time, and would reduce the cost of
the program.

The proposal was originally introduced by Dr. Golden and other board
members, who said they were pleased with the progress that had been
made on the program.

"We are pleased with the progress that has been made on the medical
record program," Golden said. "The program is a no-lose proposition for
the hospital and the patients, and we are looking forward to seeing it
become a reality."
