United Way starts annual fund drive

The United Way of Paso Robles has kicked off its annual fund drive. The goal is to raise $300,000, a $10,000 increase from last year's drive. A kicked-off dinner in the Mist on Thursday, Oct. 4, included a keynote address by United Way President Paul Krieger, who discussed the importance of community support for current and future needs.

Palo Robles and the region have received a $25,000 grant from the United Way of America to help fund the campaign. The funds will be used to support local agencies that provide essential services.

Palo Robles residents are encouraged to donate to the United Way to help reach the goal. Donations can be made online at unitedwaypr.org or by mail to United Way of Paso Robles, P.O. Box 33, Paso Robles, CA 93447.

Palo Robles is one of 665 communities across the nation participating in the United Way's My Way program, which allows donors to choose how their contributions are used.

Explosion closes city incinerator for three days

By SHERRY KOCONE

City officials said Saturday that the city's incinerator will be closed for three days due to an explosion that occurred in the facility. The incinerator is located at 501 N. Los Osos St. and processes around 600 tons of waste per week.

The explosion occurred at 10:30 a.m. on Monday, causing a loud noise and smoke that could be seen from several blocks away. The fire department was called to the scene, but no injuries were reported.

The incinerator is used to burn waste, reducing the amount of waste sent to landfills. City officials said they are working to determine the cause of the explosion and will begin the process of reopening the facility as soon as it is deemed safe.

County again considering joint task force

For the third time this year, San Luis Obispo County supervisors are considering whether or not to join an existing joint task force for the community. The task force was first proposed in June, during a meeting of the Tri-County Narcotics and Intelligence Task Force (TNTF), which consists of representatives from San Luis Obispo County, Paso Robles, and Arroyo Grande.

San Luis Obispo's beaches are a popular destination for marijuana tourists, and county officials have expressed concern about the number of visitors who are using the drug while visiting the area.

The new joint task force would be modeled after the existing one in Paso Robles, which has been successful in combating crime and drug use in the area. The Paso Robles task force has been credited with reducing crime and drug use in the city by 30 percent since it was established in 2011.

Junior 805, a local non-profit organization, has offered to assist with the creation and implementation of the new task force.

School board hires new teachers, renews purchasing agreement

By CARRIE MONFORD

The Paso Robles Joint Union High School District (PRJUHSD) has hired two new teachers and renewed its purchasing agreement with a local supplier.

The district has hired Matthew Jenkins as a science teacher at Arroyo Grande High School and Lisa Martinez as a math teacher at San Luis Obispo High School. Both teachers have experience in their respective fields and will be joining the district on July 1.

The district also renewed its purchasing agreement with U.S. Printing & Graphics, a local printing company. The agreement includes the purchase of a variety of items, including textbooks, yearbooks, and other printed materials.

The agreement is valid until June 30, 2024, and includes a provision for automatic renewal unless either party provides written notice of termination 30 days prior to the end of the agreement.

Cardage Independent School District (CISD) has announced that the Steward Geiger Elementary School will be closed at the end of the current school year, effective June 30, 2023. The district plans to convert the school into an alternative education center.

The decision to close the school was made after a comprehensive review of the district's enrollment projections and financial resources. The district has had significant challenges in recent years due to declining enrollment and increased costs.

The decision to close Steward Geiger Elementary School will have a significant impact on the community, and the district is committed to working with families and students to ensure a smooth transition during this difficult time.
Resources useful in locating ancestor’s land

Know Your Heritage by Leila B. LaGrone

As an engaging of how our may our ancestors have lived, I am writing to share some insights about the process of locating and learning about our heritage. This can be a rewarding experience, as it allows us to connect with our past and gain a deeper understanding of our family's history.

For many years, genealogical research has been a popular hobby among families. It involves gathering information about our ancestors, such as their names, dates of birth and death, and places of residence. This information can be used to create family trees and learn more about our ancestors' lives.

One of the main tools used in genealogical research is the use of historical records. These records can include birth certificates, marriage certificates, death certificates, military records, and census records. By examining these records, we can gain a better understanding of our ancestors' lives.

Another important tool is the use of family history websites and databases. These resources provide access to a vast amount of information about our ancestors, and can be used to search for family members who may have lived in the same area.

In conclusion, genealogical research is a valuable tool for learning about our ancestors and connecting with our past. By using historical records and family history websites and databases, we can gain a deeper understanding of our family's history and learn more about our ancestors' lives.

Innovations in BISD classrooms

New technology, techniques making a difference for Beaverton

By LAURA NEYBECK

New technology and teaching techniques are being utilized in BISD classrooms to enhance learning and improve student achievement. Teachers are incorporating the latest tools and methods to engage students and make learning more effective.

One such innovation is the use of technology in the classroom. Teachers are incorporating computers, tablets, and other electronic devices to create interactive learning experiences. This allows students to explore topics in a more dynamic way and enhances their understanding.

Another area where BISD is making a difference is in the use of digital learning platforms. Students are now able to access educational materials online, allowing them to learn at their own pace and explore topics in more depth.

BISD's commitment to technology is not only limited to the classroom. The district has also made significant investments in improving school facilities, including the addition of new computer labs and other technological resources.

In conclusion, BISD is making great strides in incorporating new technology and teaching techniques into their classrooms. These efforts are helping to create a more engaging and effective learning environment for students and are making a positive impact on their education.

Donalds open Carthage office

By ROBERT KNOX

Dr. Ben Donald, a Fellow of the World's most prestigious medical schools, has opened an office in Carthage. The office is located on the corner of Main and Center Streets, in the building formerly occupied by Dr. John Smith.

Dr. Donald, who is also a Fellow of the Royal College of Surgeons in Ireland, has been practicing medicine in Carthage for the past three years. He was previously associated with the Hospital for Sick Children in London, England.

The new office will offer a full range of medical services, including general practice, pediatrics, and surgery. Dr. Donald is also a member of the American Medical Association and the Medical Society of the State of Texas.

Dr. Donald is currently taking new patients and is available for appointments.

**Panola County Devotional Page**

**YOUR NEWSPAPER costs little but its value is great.**

"When you buy it for a nominal price or a gift at your house, your newspaper helps you to reach the world, the nation or your local community, depending on its scope. Of course, you can get news, features, and advice from the local newspaper. But if you use it for the depth of stories, nothing can beat your newspaper. The front page carries people's opinions and asks for your support to one good and other types of developments. The classified section tells two kinds of means, education and business, and many other vital things. Not all, the influence of the newspaper extends as much as your knowledge of the facts. Not better than the freedom of the press, this great nation of ours."

Drugs can hurt your body, and make you feel bad!

Real friends never ask you to take anything that will hurt you!
Your doctor or your parents will give you any medicine you need!

If anyone offers you drugs.

Just say...

Color all the shapes with 1 dot blue.
If anyone tries to give you drugs...

Here are some people you can tell.

Just say NO if anyone offers you a ride! Tell your mom or dad!
Follow the maze (do not cross over any lines) to find out what to say when someone offers you DRUGS!

**NO!**

Walking with a friend is always a good idea.

Rodeo Girls are good athletes. They know to say no to dope and keep sharp for competition.
Keep up the Good Work, Kids!
