Gary boy recovering from burns

A Gary boy has been released from the Texas Burn Center after undergoing extensive treatment to recover from second and third degree burns sustained in a September 15 accident.

Gary was burned when a container of gasoline exploded, causing flames to engulf him. The exact cause of the explosion is under investigation by the local fire department.

The boy, who is 12 years old, was in stable condition when he was transferred to the Texas Burn Center for further care.

The incident occurred in Gary, a small town located in Panola County, Texas. The boy's family is grateful for the support and assistance they have received from the community during this difficult time.

Beckville Elementaryadal perators were hit by a severe ice storm that knocked out power to many homes and businesses in the area. The storm caused extensive damage to the school's electrical system, forcing the school to close and delaying classes for several days.

The school's principal, Ms. Johnson, said the students were able to return to school on the 22nd of the month, but that the school would need to conduct a full assessment of the damage before making a decision about when classes would resume.

The ice storm also caused power outages throughout the area, affecting hundreds of residents. The local utility company worked tirelessly to restore power to the affected areas, and many residents were without electricity for several days.

The ice storm was caused by a cold front that moved through the region, bringing temperatures well below freezing and causing heavy precipitation in the form of sleet and ice.

Panola, Eastfield split doubleheader

Glen Taylor pitched a three-hitter and drove in the only run as Panola (11-10, 2-2) beat Eastfield 1-0 in the second game of a doubleheader at the Panola College Softball Complex on Thursday. Taylor, who pitched all 7 innings, allowed only 3 hits, had 8 strikeouts and walked 1. Eastfield (2-12, 1-4) rallied in the third inning to tie it 1-1 but Taylor retired the next three batters to end the game.

Panola County oil, gas production remains strong

While local oil and gas production has remained relatively stable in recent years, Panola County continues to be a significant contributor to the state's energy industry. Local companies such as Marathon Oil and Apache Corporation are actively drilling for oil and gas in the area. In 2020, Panola County produced 3.2 million barrels of crude oil and 13.4 billion cubic feet of natural gas. The county is home to several large oil and gas fields, including the Panola Oatman Field, which is one of the oldest and largest oil fields in Texas.

BEND ELON

By Mr. R. L. Peterson

On Feb 15, 1977, a meeting was held at the Elcona Senior High School for parents of students in the School District. The purpose of the meeting was to discuss the proposed changes in the schools and to hear the views of the parents on these changes.

The meeting was attended by Mr. Peterson, who is the principal of the school, and several parents. Mr. Peterson discussed the changes that are planned for the school, such as the addition of new classrooms and the improvement of the facilities. He also explained the reasons behind these changes, such as the increasing number of students in the school.

The parents expressed their concerns about the changes, particularly about the impact of the new classrooms on the existing classrooms. They also raised questions about the funding for these changes.

Mr. Peterson assured the parents that the changes are necessary and that they will benefit the students. He also promised to keep them updated on the progress of the changes.

The meeting ended with a discussion on the next steps to be taken. It was decided that a follow-up meeting will be held in the next few weeks to discuss the implementation of the changes.
