Don't let undetected breast cancer steal precious time from you or the people who depend on you.

The best protection against the risk of breast cancer is early detection. A mammogram can detect cancerous tumors up to two years before they could be felt by you or your doctor.

So if you're a woman 40 or older, and you've never had a mammogram or it's been more than one to two years since your last regularly scheduled mammogram, now is the time to have one – for only $50.

To schedule your screening, call ETMC Carthage at (903) 693-0285.

As parents, it seems that we are always telling our children not to be afraid of one thing or another. Don’t be afraid of the dark, of the Thunder, or going to the doctor. We fear our children shouldn’t be afraid of things that we’ve not afraid of. And usually, as long as the parent is present, the child may overcome some of their fear knowing that their mother or father is there to take care of any situation.

Although everyone probably has a fear of something, knowing that God our Father is always with us, should be a comfort to us whenever we become anxious or fearful. Telling ourselves or someone else to not be afraid is a nice statement, but one that is usually easier said than done. Building up a loving and trusting relationship with God is the best way to overcome our fears. The Bible tells us that God is love and there is no fear in love, and perfect love casts out fear.

...I will fear no evil...for thou art with me...

Psalm 23:4
