Instructional Goals and Purposes:

The purpose of this course is to prepare students to manage the well-being and health of student athletes. Students will learn to recognize the signs and symptoms of common severe athletic injuries and differentiate them from less severe athletic injuries. Students will also learn the most up to date prevention methods and techniques.

Learning Outcomes:

After studying all materials and resources presented in the course, the student will be able to:

1. Evaluate the dimensions of health and how they relate to personal and/or community wellness.
2. Explain the importance of nutrition, a healthy lifestyle, and staying physically active in preventing premature disease and promoting wellness.
3. Describe the leading health problems, trends, and needs of diverse populations.
4. Identify major agencies, foundations, and associations supporting health at local, state, national and international levels as well as data tools and resources.
5. Evaluate sources of health information, including the internet, to determine reliability.
6. Develop and implement a plan of healthy behavior to meet personal and community needs to enhance quality of life.

Course Content:

A general description of lecture/discussion topics included in this course are listed in the Learning Objectives section of this syllabus.

Students in all sections of this course will learn the following content:

1. To develop an understanding of personal health and wellness including:
 - a. Physical Health
