### MEDICATIONS WILL NOT BE ADMINISTERED DURING THIS CLINICAL ROTATION UNLESS PRECEPTOR IS AVAILABLE.

**Methods of Teaching:**
1. Clinical experience
2. Simulated Clinical may be used (i.e. simulation lab, computer-aided simulations, etc.)
3. NCSBN 15 week Course: [http://www.learningext.com/students/p/nclex_pn.aspx](http://www.learningext.com/students/p/nclex_pn.aspx)

**NCLEX -PN Independent Study** – This independent study will be six weeks (48 Hours) of direct practice in the computer lab using the NCSBC Course. Maximum of 8 hours per week will be scheduled. The hours must be completed in the computer lab at your current campus only. Prior to starting the modules students are required to take a pre-test. Upon completion of the pre-test make an appointment with an instructor to review. Bring a copy of the test results to the meeting with the instructor. The student will be required to log in and out with verification by faculty or staff. The 15 week NCSBN course will be utilized, which will allow students to continue using the resources as a review until the time of NCLEX testing. All modules and practice exams must be completed with 90% or higher in order to pass. Modules and exams may be taken as many times as necessary to achieve the 90% or above.

A certificate of completion must be submitted when the modules are complete as well as a listed of all modules showing the passing grades.

**Course Requirements:**
1. **The student must have an average grade of 75 or above in order to successfully complete this course.**
2. Preparation and active participation in class.
3. Outside individualized research in texts, videos, CAIs and journals.
4. Compliance with all rules and regulation as outlined in the current Department of Nursing Student Handbook and Panola College catalog.

**Canvas:**
Canvas may be used to supplement the course. You will be expected to check your email, reply to messages, and complete assignments on Canvas as instructed. As you know, there is not enough time to review all the content in the book. Therefore, **you will be responsible for reviewing and studying selected chapters independently.**

**Grading Scale:**

- A = 90-100
- B = 80-89.99
- C = 75-79.99
- F = 74.99 and below
- NO ROUNDING
**Overall Course Grade:**

1) Written Clinical Assignments 40%
2) Clinical Evaluation/VCE/Case Study 10%
3) NCLEX-PN Independent Study Course Grade 30%
4) Service learning with reflection 20%

**Skills Checklist**

The same skills checklist that was used in Clinical I-III will be used in this course. Students are expected to seek out opportunities to practice skills so that every skill can be achieved. The more practice you have with each skill, the more comfortable you will be when you graduate.

SCANS CRITERIA

1) Foundation skills are defined in three areas: basic skills, thinking skills, and personal qualities.

a) Basic Skills: A worker must read, write, perform arithmetic and mathematical operations, listen, and speak effectively. These skills include:
   i) Reading: locate, understand, and interpret written information in prose and in documents such as manuals, graphs, and schedules.
   ii) Writing: communicate thoughts, ideas, information, and messages in writing, and create documents such as letters, directions, manuals, reports, graphs, and flow charts.
   iii) Arithmetic and Mathematical Operations: perform basic computations and approach practical problems by choosing appropriately from a variety of mathematical techniques.
   iv) Listening: receive, attend to, interpret, and respond to verbal messages and other cues.
   v) Speaking: Organize ideas and communicate orally.

b) Thinking Skills: A worker must think creatively, make decisions, solve problems, visualize, know how to learn, and reason effectively. These skills include:
   i) Creative Thinking: generate new ideas.
   ii) Decision Making: specify goals and constraints, generate alternatives, consider risks, and evaluate and choose the best alternative.
   iii) Problem Solving: recognize problems and devise and implement a plan of action.
   iv) Visualize (“Seeing Things in the Mind’s Eye”): organize and process symbols, pictures, graphs, objects, and other information.
   v) Knowing How to Learn: use efficient learning techniques to acquire and apply new knowledge and skills.
   vi) Reasoning: discover a rule or principle underlying the relationship between two or more objects and apply it when solving a problem.

c) Personal Qualities: A worker must display responsibility, self-esteem, sociability, self-management, integrity, and honesty.
   i) Responsibility: exert a high level of effort and persevere toward goal attainment.
   ii) Self-Esteem: believe in one’s own self-worth and maintain a positive view of oneself.
   iii) Sociability: demonstrate understanding, friendliness, adaptability, empathy, and politeness in group settings.
   iv) Self-Management: assess oneself accurately, set personal goals, monitor progress, and exhibit self-control.
   v) Integrity and Honesty: choose ethical courses of action.

2) Workplace competencies are defined in five areas: resources, interpersonal skills, information, systems, and technology.

a) Resources: A worker must identify, organize, plan, and allocate resources effectively.
   i) Time: select goal-relevant activities, rank them, allocate time, and prepare and follow schedules.
   ii) Money: Use or prepare budgets, make forecasts, keep records, and make adjustments to meet objectives.
   iii) Material and Facilities: Acquire, store, allocate, and use materials or space efficiently. Examples: construct a decision time line chart; use computer software to plan a project; prepare a budget; conduct a cost/benefits analysis; design an RFP process; write a job description; develop a staffing plan.

b) Interpersonal Skills: A worker must work with others effectively.
   i) Participate as a Member of a Team: contribute to group effort.
   ii) Teach Others New Skills.
iii) Serve Clients/Customers: work to satisfy customer’s expectations.
iv) Exercise Leadership: communicate ideas to justify position, persuade and convince others, responsibly challenge existing procedures and policies.
v) Negotiate: work toward agreements involving exchange of resources, resolve divergent interests.
vi) Work with Diversity: work well with men and women from diverse backgrounds.
Examples: collaborate with a group member to solve a problem; work through a group conflict situation, train a colleague; deal with a dissatisfied customer in person; select and use appropriate leadership styles; use effective delegation techniques; conduct an individual or team negotiation; demonstrate an understanding of how people from different cultural backgrounds might behave in various situations.

c) Information: A worker must be able to acquire and use information.
i) Acquire and Evaluate Information.
ii) Organize and Maintain Information.
iii) Interpret and Communicate Information.
iv) Use Computers to Process Information.
Examples: research and collect data from various sources; develop a form to collect data; develop an inventory record-keeping system; produce a report using graphics; make an oral presentation using various media; use on-line computer data bases to research a report; use a computer spreadsheet to develop a budget.

d) Systems: A worker must understand complex interrelationships.
i) Understand Systems: know how social, organizational, and technological systems work and operate effectively with them.
ii) Monitor and Correct Performance: distinguish trends, predict impacts on system operations, diagnose deviations in systems’ performance and correct malfunctions.
iii) Improve or Design Systems: suggest modifications to existing systems and develop new or alternative systems to improve performance.
Examples: draw and interpret an organizational chart; develop a monitoring process; choose a situation needing improvement, break it down, examine it, propose an improvement, and implement it.

e) Technology: A worker must be able to work with a variety of technologies.
i) Select Technology: choose procedures, tools or equipment including computers and related technologies.
ii) Apply Technologies to Task: understand overall intent and proper procedures for setup and operation of equipment.
iii) Maintain and Troubleshoot Equipment: Prevent, identify, or solve problems with equipment, including computers and other technologies.
Examples: read equipment descriptions and technical specifications to select equipment to meet needs; set up and assemble appropriate equipment from instructions; read and follow directions for troubleshooting and repairing equipment.
