Proposed county budget higher; taxes the same

The prepared budget used by the county officials on Monday, Sept. 4, was $6,260,000 higher than the previous one, and this was the highest increase in the budget in a dozen percent pay increase for all county employees, including the county commissioners.

The increase in the budget is the result of the increase in the county's property tax rate, which went up from 17 mills to 20 mills, the rate that will be used to assess property taxes in the county.

The biggest increase in the budget is in the area of property tax assessment for all county employees, including the county commissioners.

The proposed budget used by the county commissioners is not final, and changes may be made in the final budget before it is approved by the county commissioners.

Fred Hall, chairman of the Florida County Commissioners Association, left, in foreground, with Commissioners Phil Adams, left, and John Joseph, right, listens during a meeting of the Florida County Commissioners Association in Tallahassee. Commissioners were discussing a report by the state comptroller's office that showed a $9 million deficit in the state's unemployment compensation fund. Hall said the deficit could affect the state's budget if not resolved. "We're concerned about the impact of the deficit on the state's budget," Hall said. "We need to find a way to resolve the deficit to ensure the state's budget is balanced."

Inflation hurts. Inflation has hit the meat eater and the real estate investor. It is one of the major factors in the current economic situation. It is a problem that must be dealt with. There are several ways to combat inflation. One way is to decrease the amount of money in circulation. Another way is to increase interest rates. Still another way is to increase taxes. Each of these methods has its advantages and disadvantages. It is up to the government to decide which method is best. Inflation is a serious problem that must be dealt with. It is a problem that affects everyone. It is a problem that must be solved.
