America II is emerging

Something profound but quite innocent is happening in Texas. From the fields where people live in and walk about, the baby steps of a new and unprecedented change are being taken. This change is visible in the way people dress, the way they talk, the way they think. It is not a revolution, but it is a transformation.

The public is making up its mind, and we are seeing it reflected in the way people vote. In Texas, the public is demanding more from its leaders, more accountability, more honesty, more results. The public is demanding that its leaders make it easier for people to get ahead, to get a fair deal.

This is not a new phenomenon. It has been happening for a long time, but now it is moving to a new level. The public is demanding that its leaders make a difference, that they are not just going through the motions, that they are not just going to肯定会 failure. The public is demanding that its leaders are going to make it happen.

Doomsayers were wrong

Three years ago, people were saying that our economy was going to collapse, that we were going to have a depression. They were saying that the world was going to end, that the end of the world was going to happen. They were saying that the world was going to end.

But they were wrong. The economy is growing, and the world is not ending. The world is still here, and it is not going to end. The world is still here.

The world is still here. The world is still here. The world is still here.

The world is still here.

---Dee's Doodles---

Doodles closes chapter, opens another

If you were one of those "normal" people who thought that the world was ending, you probably never thought that you would be alive to see the end of the world. You probably never thought that you would be alive to see the end of the world.

But you are alive to see the end of the world. And you should be happy about it. You should be happy about it.

You should be happy about it.

You should be happy about it.

You should be happy about it.

Bulldogs turn tables on Rabbits, 34-13

By VIC PARKER

Carthage's defense was the difference Saturday as the Bulldogs' defense held the Rabbits to 105 yards rushing and 134 passing.

The defense forced the Rabbits into three interceptions and a Safety.

The defense also held the Rabbits to 17 points on their own territory.

It's not always rosy for super powers

By RICHARD CONRAD

Well sports fans, the King is dead, long live the Super powers of 10,000 pounds! Yes, the past is history and we're back to the future with the return of the Super powers. Old timers will remember the good old days when the Super powers were the dominant force in American football. But even then, they had their ups and downs. The Super powers went through a period of decline after World War II, but they returned to their former glory in the 1980s. Today, the Super powers are once again the dominant force in American football. The only question is whether they will be able to sustain their dominance or if they will fall back into the same pattern of decline that they went through in the past. Only time will tell.
