Catalog Description: An analysis of the economy as a whole including measurement and determination of Aggregate Demand and Aggregate Supply, national income, inflation, and unemployment. Other topics include international trade, economic growth, business cycles, and fiscal policy and monetary policy.

Prerequisites: None

Semester Credit Hours: 3
Lecture Hours per Week: 3
Lab Hours per Week: 0
Extended hours: 0
Contact Hours per Semester: 48

State Approval Code: 45.0601.5125

Class section meeting time:

Alternate Operations During Campus Closure: In the event of an emergency or announced campus closure due to a natural disaster or pandemic, it may be necessary for Panola College to move to altered operations. During this time, Panola College may opt to continue delivery of instruction through methods that include but are not limited to: online learning management system (CANVAS), online conferencing, email messaging, and/or an alternate schedule. It is the responsibility of the student to monitor Panola College’s website (www.panola.edu) for instructions about continuing courses remotely, CANVAS for each class for course-specific communication, and Panola College email for important general information.

Core Components and Related College Student Learning Outcomes
This course counts as part of the academic requirements of the Panola College Core Curriculum and an Associate of Arts or Associate of Science degree. ☑ Yes ☐ No: If no, skip to Instructional Goals.

The items below marked with an X reflect the state-mandated outcomes for this course IF this is a CORE course:

☑ Critical Thinking Skills – to include creative thinking, innovation, inquiry and analysis, evaluation and syntheses of information
  ☑ CT1: Generate and communicate ideas by combining, changing, or reapplying existing information
  ☐ CT2: Gather and assess information relevant to a question
  ☐ CT3: Analyze, evaluate, and synthesize information

☑ Communication Skills – to include effective development, interpretation, and expression of ideas through written, oral, and visual communication
  ☑ CS1: Develop, interpret, and express ideas through written communication
  ☐ CS2: Develop, interpret, and express ideas through oral communication
CS3: Develop, interpret, and express ideas through visual communication

Empirical and Quantitative Skills – to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions

- EQS1: Manipulate and analyze numerical data and arrive at an informed conclusion
- EQS2: Manipulate and analyze observable facts and arrive at an informed conclusion

Teamwork – to include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal

- TW1: Integrate different viewpoints as a member of a team
- TW2: Work with others to support and accomplish a shared goal

Personal Responsibility – to include the ability to connect choices, actions, and consequences to ethical decision-making

- PR1: Evaluate choices and actions and relate consequences to decision-making

Social Responsibility – to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities

- SR1: Demonstrate intercultural competence
- SR2: Identify civic responsibility
- SR3: Engage in regional, national, and global communities

Instructional Goals and Purposes:
The purpose of this course is to provide an analysis of the economy as a whole including measurement and determination of Aggregate Demand and Aggregate Supply, national income, inflation, unemployment, international trade, economic growth, business cycles, and fiscal policy and monetary policy. Panola College’s instructional goals include 1) creating an academic atmosphere in which students may develop their intellects and skills and 2) providing courses so students may receive a certificate/an associate degree or transfer to a senior institution that offers baccalaureate degrees.

Learning Outcomes: [from the ACGM]
After studying all materials and resources presented in the course, the student will be able to:

1. Explain the role of scarcity, specialization, opportunity cost and cost/benefit analysis in economic decision-making.
2. Identify the determinants of supply and demand; demonstrate the impact of shifts in both market supply and demand curves on equilibrium price and output.
3. Define and measure national income and rates of unemployment and inflation
4. Identify the phases of the business cycle and the problems caused by cyclical fluctuations in the market economy.
5. Define money and the money supply; describe the process of money creation by the banking system and the role of the central bank
6. Construct the aggregate demand and aggregate supply model of the macro economy and use it to illustrate macroeconomic problems and potential monetary and fiscal policy solutions.
7. Explain the mechanics and institutions of international trade and their impact on the macro economy.
Course Content:
A general description of lecture/discussion topics included in this course are listed in the Learning Outcomes section of this syllabus.

Students in all sections of this course will learn the following content:

1. Definition of economics and scarcity
2. Definition of and characteristics of an economic theory
3. Application and definition of the Ceteris Paribus phrase
4. Circular flow model
5. Difference between normative and positive economics
6. Difference between microeconomics and macroeconomics
7. Three questions that every economy must answer
8. Construction and reading of a graph
9. Identification of factors of production
10. Definition and calculation of opportunity cost
11. Assumptions of and concepts illustrated by a production possibilities frontier
12. Definitions of demand and supply and the graphing of each
13. Difference between a change in demand and change in quantity demanded
14. Identification of shifters in demand and supply
15. The creation and elimination of shortages and surpluses
16. Characteristics of phases in the business cycle
17. Identify and define different price level indexes
18. Calculation of the CPI and rate of inflation
19. Difference between nominal and real gross domestic product
20. Definition and shifters of Aggregate Demand and Aggregate Supply
21. Definitions and illustrations of demand-pull and cost-push inflation
22. Calculation of gross domestic product using expenditures approach and income approach
23. Comparison of absolute income, relative income, permanent income, and life-cycle hypotheses
24. Definition and calculation of marginal propensity to consume and marginal propensity to save
25. Calculation of equilibrium level of national income
26. Relationship between aggregate expenditure and aggregate demand
27. Calculation and comparison of income multiplier and tax multiplier
28. Comparison of frictional, structural, and cyclical unemployment
29. Difference between discouraged and underemployed workers
30. Relationship between real rate of interest and inflation rate
31. Comparison of inflationary gap and recessionary gap
32. Calculation of sample fiscal policy options for closing a recessionary gap
33. Identify sources associated with economic growth
34. Comparison of recognition, implementation, and impact lags associated with countercyclical fiscal policy
35. Characteristics, functions, and types of money
36. Components of the money supply
37. Equation of exchange
38. Classical and Keynesian views of Quantity Theory of Money
39. Accounting equation components for a bank
40. Illustration of creation of money
41. Ratio indicating bank strength
42. Definition of fiscal and monetary policy
43. Structure of Federal Reserve System
44. Primary and secondary tools of Federal Reserve System
45. Comparison of progressive, regressive, and proportional tax structures
46. Comparison of absolute and comparative advantage
Methods of Instruction/Course Format/Delivery:

This course will be offered online and face-to-face in the fall semesters. Students in both the face-to-face class and in the online class will have access to this course via the Panola College course delivery system, Canvas. Course content in the online version of ECON 2301 is the same as content used in the face-to-face version of the class.

Students in the face-to-face class will meet regularly for lecture over the material. Although lecture and reading assignments are the primary delivery methods, other instructional techniques may include classroom discussion, audio-visual presentations, speakers, critical thinking exercises, and group activities. Students are also able to complete the course online. Students in the internet class will only be required to meet with the instructor for activities detailed in Canvas.

An online course in ECON 2301 at Panola College is designed for students who are capable of the self-discipline necessary in a non-structured situation to complete a three-hour course in one semester.

Major Assignments / Assessments:
The following items will be assigned and assessed during the semester and used to calculate the student's final grade.

Participation/Discussion:
Attendance in the face-to-face class is required and expected. Students are expected to notify the instructor of any absences ahead of class. There will be a discussion post assigned for each module to encourage consistent engagement and understanding of course material. Students are expected to post their response to the prompt AND at least two responses to the posts of their peers. Discussion responses need to be thoughtful, professional, and thorough to receive full points. Discussions will be due the day before the testing window opens for that chapter and will not be re-opened after the due date for any reason.

Homework:
Homework will consist of end-of-chapter assessment questions to be completed in the online course delivery system, Canvas. Homework may include mathematical calculations, critical thinking response, and practical completion of charts and graphs. Assignments not completed by the due date posted in Canvas will not be re-opened. PLEASE NOTE: ALL assignments are due at 11:59 PM CST unless stated otherwise. It is the student's responsibility to be aware of all course quiz due dates.

Assessment(s):
There will be four tests during the semester administered through Canvas. Tests will cover important concepts and material from the chapters covered. Tests will be delivered using the Honorlock proctoring service. Honorlock is an online proctoring solution offered by Panola College that records the exam session allowing students to test outside the classroom during the scheduled testing time frame. Any exam incidents will be reported back to Panola College faculty. Honorlock does not require students to download any software or create any logins. Students are expected to complete the tests in the time frame assigned. Tests not completed in the time frame will not be re-opened.

Test 1 - Chapters 1 - 5
Test 2 - Chapters 6 - 10
Test 3 - Chapters 11 -14
Test 4 - Chapters 15 -17
Course Grade:
The grading scale for this course is as follows:

- Participation/Discussions - 10%
- Quizzes - 25%
- Assessments - 65%

Texts, Materials, and Supplies:
- This course textbook is offered free of cost via online access or pdf download.

Required Readings:
- Students should read any assigned reading and notes posted in Canvas. This may include chapters, articles, notes pages, and/or examples.

Recommended Readings:
- None

Other:
- Courses conducted via video conferencing may be recorded and shared for instructional purposes by the instructor.
- For current texts and materials, use the following link to access bookstore listings: http://www.panolacollegestore.com
- For testing services, use the following link: http://www.panola.edu/elearning/testing.html
- If any student in this class has special classroom or testing needs because of a physical learning or emotional condition, please contact the ADA Student Coordinator in Support Services located in the Charles C. Matthews Student Center or go to http://www.panola.edu/studentsuccess/disability-support-services/ for more information.
- Withdrawing from a course is the student’s responsibility. Students who do not attend class and who do not withdraw will receive the grade earned for the course.

Academic Integrity:
- Scholastic dishonesty shall include, but not be limited to cheating on a test and plagiarizing.
- Cheating on a test shall include:
  - a. Copying from another student’s test
  - b. Using test materials not authorized by the person administering the test
  - c. Collaborating with or seeking aid from another student during a test without permission from the test administrator
  - d.知ingly using, buying, selling, stealing, or soliciting, in whole or in part, the contents of an un-administered test.
  - e. The unauthorized transporting or removal, in whole or in part, of the contents of the un-administered test. f. Substituting for another student, or permitting another student to substitute for one’s self, to take a test.
  - g. Bribing another person to obtain an un-administered test or information about an un-administered test.
- Plagiarism shall be defined as the appropriating, buying, receiving as a gift, or obtaining by any means another’s work and the unacknowledged submission or incorporation of it in one’s own written work.
- Any student caught cheating or plagiarizing work will receive an immediate “0” for the assignment/quiz/test. Depending on the circumstances of the event, a student may receive penalties beyond the “0” grade that may include dismissal from the course or dismissal from the College in those cases warranting the maximum punishment.
