Core Components and Related College Student Learning Outcomes
This course counts as part of the academic requirements of the Panola College Core Curriculum and an Associate of Arts or Associate of Science degree. ☑ Yes ☐ No: If no, skip to Instructional Goals.

The items below marked with an X reflect the state-mandated outcomes for this course IF this is a CORE course:

☑ Critical Thinking Skills – to include creative thinking, innovation, inquiry and analysis, evaluation and syntheses of information
  ☑ CT1: Generate and communicate ideas by combining, changing, or reapplying existing information
  ☐ CT2: Gather and assess information relevant to a question
  ☐ CT3: Analyze, evaluate, and synthesize information

☑ Communication Skills – to include effective development, interpretation, and expression of ideas through written, oral, and visual communication
  ☑ CS1: Develop, interpret, and express ideas through written communication
  ☐ CS2: Develop, interpret, and express ideas through oral communication
  ☐ CS3: Develop, interpret, and express ideas through visual communication

☑ Empirical and Quantitative Skills – to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions
  ☑ EQS1: Manipulate and analyze numerical data and arrive at an informed conclusion
  ☐ EQS2: Manipulate and analyze observable facts and arrive at an informed conclusion

☐ Teamwork – to include the ability to consider different points of view and to work effectively with
others to support a shared purpose or goal
☐ TW1: Integrate different viewpoints as a member of a team
☐ TW2: Work with others to support and accomplish a shared goal

☐ Personal Responsibility – to include the ability to connect choices, actions, and consequences to ethical decision-making
☐ PR1: Evaluate choices and actions and relate consequences to decision-making
☒ Social Responsibility – to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities
☐ SR1: Demonstrate intercultural competence
☐ SR2: Identify civic responsibility
☒ SR3: Engage in regional, national, and global communities

Instructional Goals and Purposes:

The purpose of this course is to introduce a general study of the field of psychology, covering the board schools of thought and major issues considered in psychology.

The second goal is to familiarize the student with concepts, terminology and important persons in psychology, then to provide an understanding and framework for further study in this area, and to aid the individual in becoming a better consumer of mental health resources.

Learning Outcomes: [from the ACGM catalog]
After studying all materials and resources presented in the course, the student will be able to:

1. Identify various research methods and their characteristics used in the scientific study of psychology.
2. Describe the historical influences and early schools of thought that shaped the field of psychology.
3. Describe some of the prominent perspectives and approaches used in the study of psychology.
4. Use terminology unique to the study of psychology.
5. Describe accepted approaches and standards in psychological assessment and evaluation.
6. Identify factors in physiological and psychological processes involved in human behavior.

Course Content:

Students in all sections of this course will learn the following content:

1. The history and basic theories of Psychology.
2. How research is conducted.
3. The biological basis for behavior from the cellular level to the nervous system.
4. How sensory organs send sensations to the brain and how we perceive that information.

5. The nature of consciousness and altered states of consciousness.

6. What is learning and how do we explain it.

7. What is memory and what are the processes involved with creating and retrieving memory.

8. Cognition: Language and how we use information to problem solve.

9. What are motivations and emotions, and how both effect behaviors.

10. How we develop from concept through adulthood.

11. How do we understand personality.

12. How our behaviors are influenced by those around us.

13. What is stress, how does it impact us and what can we do.

14. What is meant by psychological disoreders.

15. How do we provide treatment for psychological disorders and mental health.

**Methods of Instruction/Course Format/Delivery:**

In traditional face-to-face classes instruction will consist of lecture, class discussion and class room assignments. For online class instruction will consist of the student completing the readings and assignments for each chapter, also watching the video lecture for each chapter. Hybrid classes will be a mixture of class room instruction with online assignments to augment classroom work. Class attendance is required for face-to-face class and hybrid class and will be recorded. For online class it will be determined by number and length of log in's and submission of assignments.

**Major Assignments / Assessments:**
The following items will be assigned and assessed during the semester and used to calculate the student’s final grade.

**Assignments**
Projects and Essays: In this Winter-term semester there will be between three projects/essays to allow the student to explore in greater detail a concept presented. An example of this would be that for the chapter on personality the student would complete an online personality assessment and then reflect on how valid they felt the instrument was in describing their personality. Grading for such projects generally come from the length and depth of the student’s response. Essays topics asks for you to think about and reflect on the information from the chapter. An example would be from the chapter on learning and behavior for the student to describe a time when behavior modification was used on them. These assignments are briefer than projects, but again points are rewarded for length and depth of answer.
Quizzes: The chapters may have quiz banks of study questions. The practice quizzes are to help the student test their knowledge of the chapter. You will have four attempts on each practice quiz, each time seeing some different questions.

Assessment:

Tests: You will be taking two exams. Realize in a Winter-term there is a lot of material that is covered in a short time, so tests cover several chapters. There are two tests. Test #1 covers chapters 1 – 7 and Test #2 covers 8,9,11-15. For information on how and when the tests are given read over the article on Class Info, also found in the Intro Module.

Course Grade:
The grading scale for this course is generally follows:

Tests: 50%
Final Exam: 5 – 8%
Projects: 25%
Practice Quizzes: 15%
Attendance (If required) 2%

Texts, Materials, and Supplies:

Textbook: Psychology, by Rosie Speilman, publisher Open Stax. The e-text is provided free at https://cnx.org/content/col11629/1.5

You will need to learn to log on to class in Canvas. Chapter notes, power point slides, assignments and quizzes are posted there.

Required Readings:
Psychology: Themes and Variations 10e
